## Greenhouse Gas Measurement and Reporting

### Course Description

**Greenhouse Gas Measurement and Reporting - EMSE 6291:** Learn methodologies and standards for measuring and reporting GHG emissions, with particular emphasis on accepted environmental accounting frameworks for the business sector and regulatory schemes. Develop the technical skills required to estimate, analyze, and manage GHG emission inventories at various scales. Develop the ability to report results that satisfy current and emerging local, national, and international requirements, and gain knowledge to advise business leaders on the implications of these inventories..

To register, go to the schedule of classes and select the Fall 2017 semester. Select "Online Courses."  
Select "Engr Mgt & Systems Engineering." Choose EMSE 6291.
